Dear Professor You,

We are proud to announce that the Brown University Chemistry Department has opened up its application for graduate admissions for Fall 2022. We hold your University and students in very high esteem and would greatly appreciate you encouraging interested students to consider Brown Chemistry for their graduate studies. Our Department performs world-class research in the areas of Organic Chemistry, Inorganic Chemistry, Physical Chemistry, Theoretical Chemistry, Nanomaterials, and Chemical Biology and will be admitting students this coming year to pursue all of these disciplines.

Our application is currently available at <https://www.applyweb.com/brown/index.fl> and our deadline for Fall 2023 admissions is December 15th, 2022. We will also be hosting a virtual Q & A session on Wednesday, November 16th, from 7:30 - 9:30 PM Eastern (<https://brown.zoom.us/j/97765578186>), where students can get further real-time guidance regarding our application process and program. For more information, please visit <https://www.brown.edu/academics/chemistry/academics/graduate-program>.

It is an exciting time for our program and university. The Chemistry Department has just completed a two year extensive infrastructure renovation. We have ongoing searches for faculty members across disciplines and the University is investing heavily in our graduate program. Last year, several of our graduate students received prestigious NSF and NIH fellowships and our faculty received Sloan, Cottrell, Dreyfus, and ACS honors for their research.

Thank you again for all of your efforts educating future leaders in the chemical sciences, and we're looking forward to another strong group of applicants for Fall 2023.

Sincerely,

  
Prof. Eunauk Kim  
Director of Graduate Admissions  
Brown University Department of Chemistry
